

Grief support for cat owners

At Cats Protection, we understand how difficult it can be for owners when their cat goes missing, has been rehomed, is nearing the end of its life or has recently passed away. To help support people during this difficult time Cats Protection runs a confidential grief support service where people can talk to a trained volunteer listener.

To promote this service we have produced a range of resources, which can be ordered free of charge and displayed around your practice. We have wallet cards, leaflets and A4 posters for your reception and public areas.

Please see overleaf for how to place an order.

Thank you for your assistance in promoting this great service – we are confident it will help your clients who are going through a difficult time following the loss of their cat.

*Thank you
xx*
